### **DETAILED ACTION**

1. This Office Action is in response to Applicant's amendments filed on 07/12/2007.

#### ***Election/Restrictions***

2. Newly submitted Claims 12 and 13 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

The invention originally claimed and the newly submitted claims are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case the originally claimed product can be used without registering an emissions credit. Additionally, the newly submitted claims are classified in class 700, subclass 286 and thus would require a different search.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, Claims 12 and 13 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

**Specification**

3. The amendments to the Specification have been accepted.

**Claim Rejections - 35 USC § 112**

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 6-8 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. In particular, the specification does not disclose "a gas injection device that introduces the fuel mixture into the cylinder" (emphasis added). Instead, the specification and Figure 4 of the drawings disclose the gas injection device (10) being provided midway along inlet pipe (9) and the resulting fuel mixture of recovered and ventilated methane gas exiting the gas injection device (10) would travel along the inlet pipe (9) to the inlet valve (41) prior to being introduced into the combustion chamber (44). Thus the gas injection device (10) is disclosed as introducing the fuel mixture into the inlet pipe as opposed to "into the cylinder".

***Allowable Subject Matter***

6. Claims 9-11 are allowed. Note that base claim 9 invokes 35 U.S.C. 112, sixth paragraph since it includes "means or step plus function" limitations and meets the 3-prong analysis.

7. The following is an examiner's statement of reasons for allowance: the prior art of record fails to disclose or render obvious the combination of features as claimed and in particular a means for adjusting a fuel mixture based on said means for diagnosing a combustion condition using a signal from the cylinder pressure detector and further a means for introducing the fuel mixture having a methane concentration of 3-5% and an air excess ratio not less than 2.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
